Milestones!

CII/CPAR MILESTONES

September 2024

eHealth Process Changes

Old Process:

CoP submitted → Participation Package Sent → Privacy check (stay here until complete) → continue onboarding (CPAR forms, EMR configuration, etc.)

New Process:

CoP submitted → Participation Package Sent → Privacy check started & onboarding process continues (CPAR forms, EMR configuration, etc.)

Result: clinics may require more support shortly after submitting CoP, rather than waiting for PIA updates

PCCM Panel Prep: Take control of your panel size

PMSP/TFP revealed significant confusion about various “panel sizes” and CPAR, so this three-part webinar series hopes to address that.

Part One

- How PMSP panel size is calculated, and how to improve panel size estimates for PMSP (and maybe PCCM) w/CPAR
- [Recording is posted!](#)

Part Two

- EMR vs CPAR panel size: Compare and correct discrepancies
- Registration is open: [October 15@12:00pm or October 16@5:30pm](#)

Part Three

- Understanding and managing Demographic Mismatches & Conflicts

Part 1 Recording is Posted

Practice Facilitation Network | Improving Panel Size Estimates for Your Physician Members

Oct 7, 2024

2:00 PM - 3:00 PM

- Webinar

Webinar Details

Topic: Improving Panel Size Estimates for Your Physician Members

Description: Join us for this webinar, where guest presenters Robert Smith (Consultant, AMA ACTT) and Christine Do (Consultant, AMA ACTT) provide an overview of how the Panel Management Support Program (PMSP) panel size is calculated, and what steps you can take to help your paneling providers get more accurate panel size estimates. PMSP panel sizes are recalculated quarterly, and scheduled to continue to March 2026, so there is still time to work on fixing panel sizes!

Introduction Contact EMR Clinic Providers Governance & Privacy Finish

Introduction

Introduction

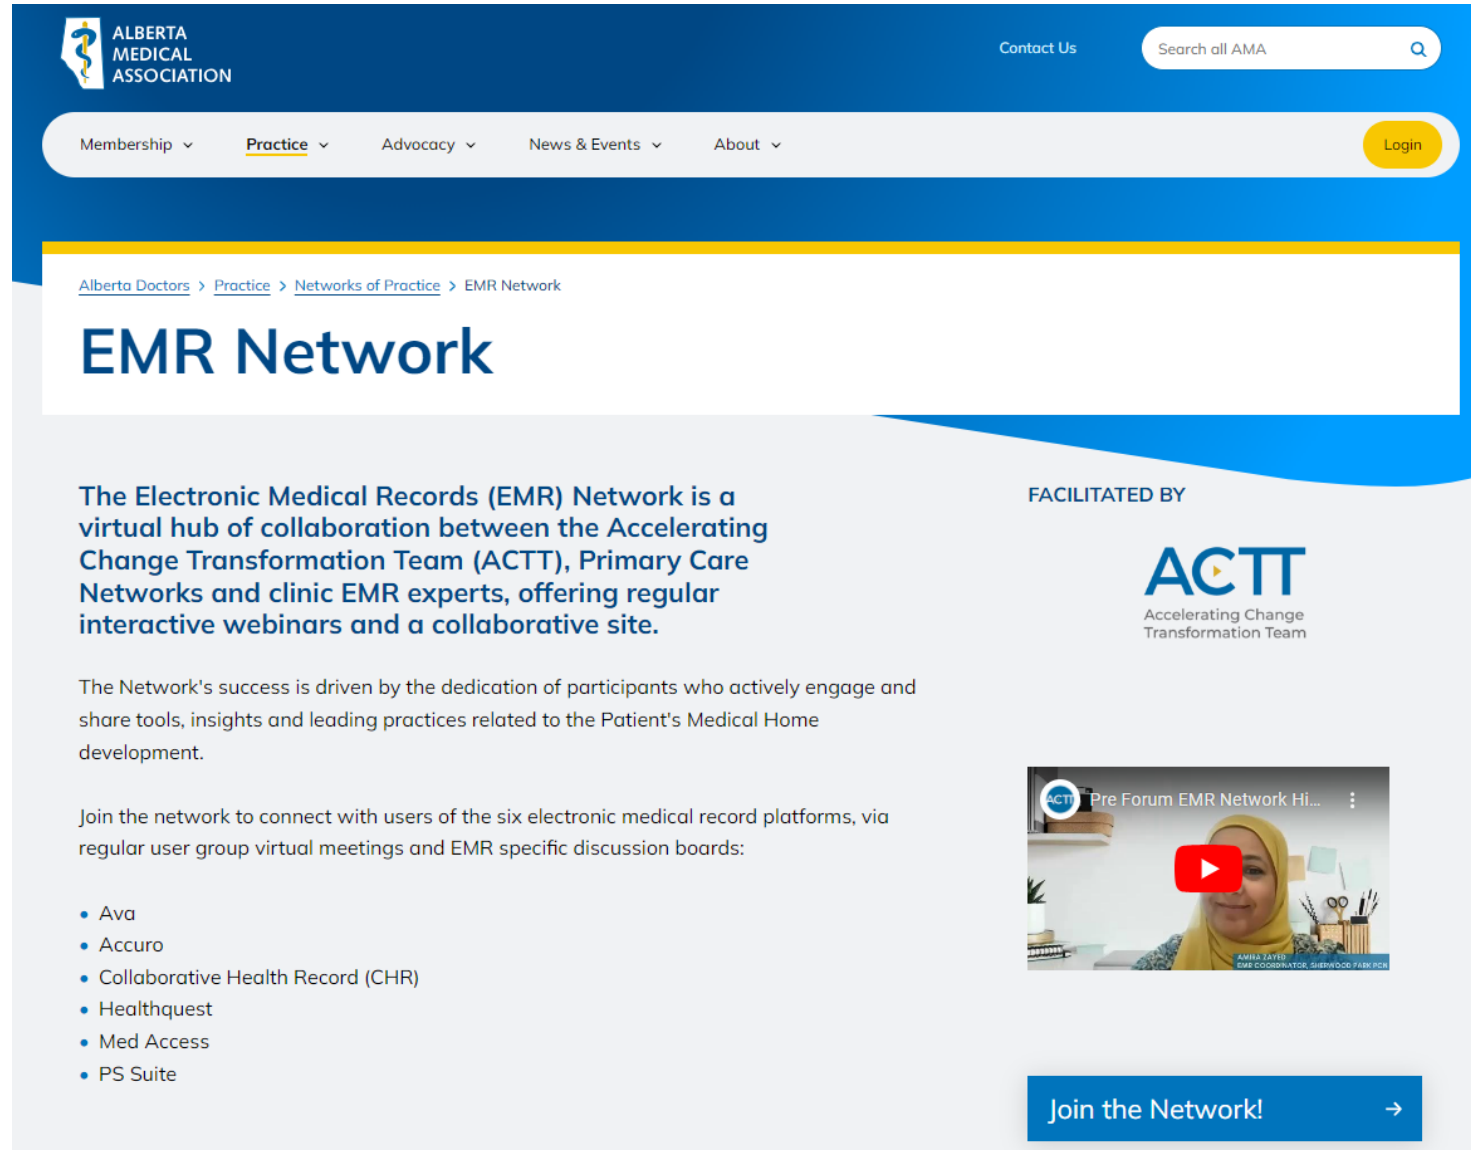

What is CII/CPAR?

CII/CPAR enables physicians and their teams to share patient information to Alberta Netcare directly from their electronic medical record (EMR).

CII/CPAR enhances communication amongst providers by enabling the sharing of important healthcare information across the province. This two-way connection between clinic EMRs and Alberta Netcare is improving continuity of care between the Patient’s Medical Home and Health Neighbourhood.

CII allows providers to send select patient information to Alberta Netcare including consult letters and information about patient visits to contribute to Community Encounter Digests (CEDs).

Join Our EMR Networks!

The screenshot shows the Alberta Medical Association website. The header includes the logo, navigation menu (Membership, Practice, Advocacy, News & Events, About), a search bar, and a Contact Us link. The breadcrumb trail is: Alberta Doctors > Practice > Networks of Practice > EMR Network. The main heading is "EMR Network". The text describes the network as a virtual hub of collaboration. It lists the facilitator as ACTT (Accelerating Change Transformation Team). A list of EMR platforms is provided: Ava, Accuro, Collaborative Health Record (CHR), Healthquest, Med Access, and PS Suite. A video thumbnail for a "Pre Forum EMR Network Hi..." is shown, featuring Amira Zafar, EMR Coordinator at Sherwood Park PCN. A "Join the Network!" button is at the bottom right.

EMR Network

The Electronic Medical Records (EMR) Network is a virtual hub of collaboration between the Accelerating Change Transformation Team (ACTT), Primary Care Networks and clinic EMR experts, offering regular interactive webinars and a collaborative site.

FACILITATED BY

ACTT
Accelerating Change Transformation Team

The Network's success is driven by the dedication of participants who actively engage and share tools, insights and leading practices related to the Patient's Medical Home development.

Join the network to connect with users of the six electronic medical record platforms, via regular user group virtual meetings and EMR specific discussion boards:

- Ava
- Accuro
- Collaborative Health Record (CHR)
- Healthquest
- Med Access
- PS Suite
